

GLUE: GREENLIGHT XPS USERS & EXPERTS

23 MARCH 2017

PARK PLAZA LONDON RIVERBANK - 18 ALBERT EMBANKMENT, SE1 7TJ

Setting up a new day-case care pathway for GreenLight XPS surgery enables men to be treated safely and effectively without admission to hospital. Moving BPH surgery to the day-case setting yields cost savings and procedural efficiencies for the NHS.

In this course, experts with experience in establishing new services will share their results, care-pathway design, business case planning and tips and tricks on service planning and design. Hear from business managers, urologists, specialist nurses and anaesthetists on best practices in this area.

AGENDA TOPICS

- How to set up a new practice as day case – *Mr. Stuart Lloyd, Queen Margaret, Fife*
- Evidence for use of GreenLight XPS in men with large prostates and high-risk of bleeding – *Mr. Richard Hindley, Basingstoke & North Hampshire Hospital*
- Creating a care plan for day case surgery, pre-operative patient assessment, catheter management, district nurse v TWOC – *Celine Briffet & Xabel Ayerdi, London Bridge & King's College Hospital, London*
- Pushing the boundaries to include more men for day-case surgery, mastering the anaesthetic technique for GreenLight in a day case setting, anti-coagulation management – *Dr. K Rajagopal, King's College Hospital, London*
- Advantages to the hospital of running GreenLight XPS as a day case procedure – *James Montgomery, Basingstoke & North Hampshire Hospital*
- *GreenLight XPS Chair: Mr. Gordon Muir, King's College Hospital, London*
- *GreenLight XPS Faculty: Mr. Richard Hindley, Mr. Stuart Lloyd*
